Creative Digital Media (Game Design) - Pass

September 2020 - May 2022

### East Sussex College - Lewes, Lewes

UAL Level 3 Diploma in Creative Digital Media Production and Technology - Distinction

September 2022 - Present

### University of Portsmouth - *Computer Games Technology BSc (Hons)*

## Work Experience

July 2019

### NCS (National Citizen Service)

July 2019

- Developed soft skills across a 4-week personal development and charity programme.
- Week 1: Team-building through outdoor activities (kayaking, camping).
- Week 2: Individual growth with training in budgeting and first aid.
- Weeks 3–4: Led and delivered an environmental project including a sponsored walk, beach clean-up, and pub quiz fundraiser.

### **Aimee's Kitchen, Seaford**

*July 2022 – Sept 2022*

- Balanced front-of-house service and back-of-house tasks under pressure.
- Improved communication and multitasking skills in a fast-paced environment.
- Became a reliable and punctual team member during high-demand shifts.

### **Church Livestream Technician**

*Volunteer Role*

- *Responsible for operating livestream cameras to broadcast weekly services*
- Independently managed video equipment and livestream software.
- Ensured high-quality and accessible broadcasts for remote viewers.
- Developed skills in timing, multitasking, and technical precision.

## **Skills**

**Problem solving** - My current university course, computer games technology as well as my college course, games development are both heavily reliant on problem solving as in coding you will come across multiple errors that you will need to correct through multiple methods like asking peers, googling it or just trying different coding techniques through trial and error. This skill is important in a job as it shows I am willing to try different methods, in a team or on my own, to be able to fix stressful situations that come up.

**Digital/technical** - Multiple of my courses from College to University have all been tech based as well as volunteering to work at a church to control the cameras which were broadcasted to a livestream. The ability to have skills in technology and multiple different computer programs is important in an ever so growing technological age because it means I can keep up to date and be

able to understand the programs that would be used in the work environment. This would help when it comes to having to fix technological problems if they arise as well as being able to use technology for problem solving.

**Teamwork** - In university I have had to partake in numerous group projects where I had to work together with other members of the team to be able to create a product that we were both happy with. In NCS the first week where a group of us had to camp our teamwork skills were developed due to us having to communicate while rowing a boat or building a tent together. In addition, in the 3rd week we had to come together to work as a team to be able to create ideas that were feasible in the scope of time we had. Teamwork is an important skill in the workplace because you need to be able to get along with and also help your coworkers around you so that operations can run smoothly.
